

6516208058.txt

Dear Sirs:

Placing restrictions on satellite radio, that I pay a monthly premium is regarded as unfair and unethical. The addition of traffic and weather services to this medium has proven to be invaluable, as the basis of my commerce depends on having this information available instantly. This is not possible with a FM or AM station, as the time delays, commercial interruptions, and pathetic disc jockeys and announcers necessitate my continued access to XM satellite radio weather and traffic in order to maintain a positive business plan, and safe travel along our busy highways. I urge you to not restrict this medium.
